

From leading edge IoT Protocols to Python Dashboarding an End2End Journey

Who am I

- Part of the  community 
- By Day: Domain (Enterprise) Architect
- By Night: Open Source Enthusiast
- Pythonista 
-  Copenhagen & Frankfurt 
- I connect People, Processes, Data and Machines

Apache Projects in context of IoT (extract)

IoT Protocols

Connecting IoT devices – OSI Model

1. Physical (Bluetooth, Ethernet, LTE, NFC, RFID, Wi-Fi, Z-Wave, Zigbee)
2. Data link (IEEE 802.15.5, LPWAN)
3. Network (IP, 6LoWPAN)
4. Transport (Transmission Control Protocol (TCP), User Datagram Protocol (UDP))
5. Session
6. Presentation
7. **Application**

IoT Protocols – Application Layer

- Advanced Message Queuing Protocol (AMQP)
- Constrained Application Protocol (CoAP)
- Data Distribution Service (DDS)
- Message Queue Telemetry Transport (MQTT)
- Lightweight Machine to Machine (LwM2M)

Advanced Message Queuing Protocol (AMQP)

- Popular Apache Frameworks:

- <https://activemq.apache.org/>

- <https://pulsar.apache.org/>

- <https://qpid.apache.org/index.html>

- Properties

- Brokered
 - Publish / Subscribe
 - Direct Exchange

Message Queue Telemetry Transport (MQTT)

- Popular Apache Frameworks:

- <https://streampipes.apache.org/>

- <https://activemq.apache.org/>

- Properties

- Tied to TCP
 - Publish / Subscribe
 - Brokered

Data Distribution Service (DDS)

- Popular Apache Frameworks:

- <https://mynewt.apache.org/>

- <https://nuttx.apache.org/>

Nuttx RTOS

- Properties

- Publish / Subscribe

- Peer-to-Peer

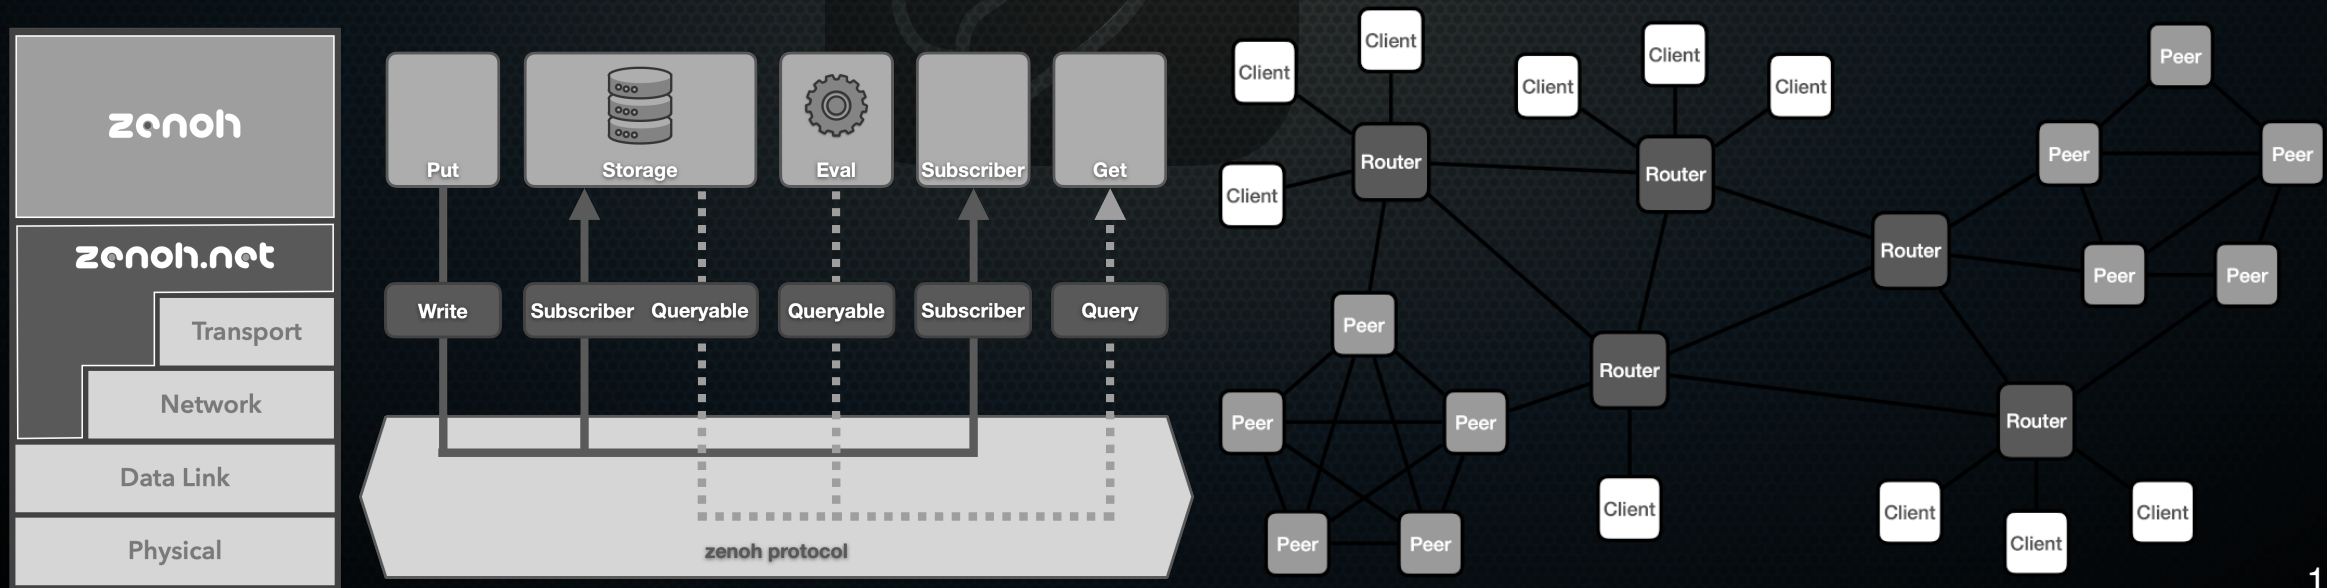

And many more...

- Checkout  PLC4X 8-)
 - <https://plc4x.apache.org/>
The universal protocol adapter for Industrial IoT

Zenoh

- Zenoh unifies data in motion, data at rest and computations. It elegantly blends traditional pub/sub with geo distributed storage, queries and computations, while retaining a level of time and space efficiency that is well beyond any of the mainstream stacks.
 - Zero Overhead Pub/sub, Store/Query and Compute.

- A high-level app and dashboarding solution for Python
 - Use the PyData tools and plotting libraries that you know and love
 - Develop in your favorite editor or notebook environment and seamlessly deploy the resulting application
 - Stream data large and small to the front end

- Integrates for instance Apache Echarts

Apache IoTDB

- IoT native database with high performance for data management and analysis
- Checkout Apache Con Asia for more details
